DeltaGraph

BEFORE YOU BEGIN

- Make sure your computer meets the minimum system requirements for DeltaGraph 5. To review these requirements, refer to “System Requirements” later in this section.
- Quit any programs that are running, including virus protection programs, because they might interfere with the installation.
- Quit the Classic environment (Mac OS 9), if it is currently running.

To quit the Classic environment, click System Preferences on the Apple menu, and then click Classic. On the Start/Stop tab, click Stop.

SYSTEM REQUIREMENTS

To install and use DeltaGraph 5, your computer must meet the following minimum requirements:

- Processor: Macintosh Power PC, G3, or later
- Operating System: Mac OS X - 10.1.5 or later, or Mac OS 9
- Memory: 128 MB of RAM
- Drives: Internal hard drive with 50 MB of free space and Mac OS Extended(HFS+) format, the default format for Mac OS X
- Display: 256 colors and a resolution of 800x600 or higher

To check if your computer meets these requirements, use the Apple System Profiler program. To start the program, open the Utilities folder in the Applications folder on your hard disk, and then double click the Apple System Profiler program file

INSTALLING DELTAGRAPH

- Insert the DeltaGraph 5 CD into your CD drive.
- Open the DeltaGraph 5 CD and double click the “Install DeltaGraph” application.
- Follow the on screen instructions.

REGISTERING DELTAGRAPH

- Stay up-to-date with the latest DeltaGraph software.
- Register your copy of DeltaGraph at www.redrocksw.com and enjoy full Technical Support and notification of software updates.

TECHNICAL SUPPORT

For 24 hour support search our on line solutions data base:
