DOMARK

Death is temporary and evil lurks...

Full motion video sequences, featuring hand painted scenes, recount the darkness that has befallen the kingdom.

Choose from 15 different characters and control the actions and destinies of up to 4 at a time.

Over 5000 locations to explore, including torture chambers, dungeons and passages where you're an unwelcome intruder.

Character attributes include profession, intelligence, strength and vitality.

For generations the land of Xorinth has prospered under the wise rule of King Meridian and the Hexaameron Council. Adept in powers of white and black magic the people of Xorinth have lived a peaceful existence.

Many years before however, an evil prince named Dragor attempted to overthrow King Meridian and was banished. Frothing with anger and bent on revenge, Dragor has returned and has cursed the land of Xorinth into a barren wasteland.

Now it is up to you to awaken this slumbering Land. Explore the castle, find what remains of the Hexaameron council and restore the kingdom. But beware! In this engrossing

fantasy role-playing adventure, things are not always what they seem. Death is temporary, evil lurks around every corner and clues abound - if you survive to find them.

**"Domark delivers!
Curse of Dragor
features sharp high
resolution graphics
and animation."**

-Dimension 3

FEATURES

- High resolution 3D graphics
- Choose from 15 interesting characters (you control 4 at a time) including warriors, wizards and thieves
- Over 5000 locations to explore and more than 500 objects to examine
- Explore hidden passages and solve complex puzzles while gaining experience to complete your quest
- Battle skilled knights, headless mummies, giant spiders, skeletons and more
- Weapons include daggers, swords, flails, spells and others

DOMARK

1900 S. Norfolk Street, Suite 110, San Mateo, CA 94403

*H*ello my brave warriors. Thank you again for taking up this quest. I have slipped this note into your Knapsack, please read it before you enter the Castle.

The adventure that awaits will test your party to their limits. Though your group the is strongest I ever sent into the Castle, I still fear that we may never defeat Dragor. Since no one has escaped the Castle, I cannot tell you about the foes you will face or even what lies ahead. I do know that the closer you get to solving the curse, the more desperate Dragor will become. He will send even more hideous monsters to destroy you.

I will attempt to magically boost the values of your party so you will stand a better chance. As the leader of the group, I thought you might want to know which professions will best serve your needs. The Scholar can cast magic, but can also read Foreign text and solve difficult puzzles. The Cleric is a spiritualist who can wield powerful religious magic and raise the undead. A Thief is the master of stealth, cunning, and dexterity. The Wizard is the leader in magic, and will be the powerful weapon against tough foes. The Alchemist has magic talents similar to those of the Scholar, and can also understand scientific papers and combine elements for potions. The Warrior is the trained in the art of combat, and will wield weapons with the most effectiveness.

In closing, if I sense that your party is in dire circumstances, I will send in my personal guardians to assist you in the fight. Seize the day and win!

Installation

Please follow the installation process outlined below. It is important that you choose the best option of installation for your machine because making the incorrect choice will greatly effect the game's performance.

Installation option #1 (Recommended)

For most Macintosh computers, the best option is to use the installation program on the CD to install the game to your hard drive. This installation is done because the game requires that the computer "swap" game screens. This means that the computer needs to continually access the game files in order to keep a steady flow of game motion. Unfortunately, most double speed (2X) CD-ROM drives are not fast enough to keep up with the game's "swapping" demands. To install the game to your hard drive, please do the following:

1. Place the Curse of Dragor CD in your CD-ROM drive.
2. Double click on the "Curse of Dragor CD" icon on your desktop.
3. Double click on the "Install Curse of Dragor" icon.
4. Follow the on-screen instructions.

Since this installation procedure takes between **25 to 30MB** of hard disk space, make sure that you have enough hard drive space before beginning the installation process. ENJOY YOUR GAME!

Installation Option #2

For those Macintosh users who have a newer Macintosh with a 4X CD-ROM drive (PowerMac 7200/7500/8500/9500 or Performa 5200/6200/6300), they have the option of playing Curse of Dragor entirely from the CD-ROM (**NOTE:** You will still need to have between **2 to 5 MB** of free hard drive space available in order to save your game. If you do not have **2 to 5 MB** of free hard drive space, you will receive an error message during play). No installation process is needed. To play the game from the CD-ROM, do the following:

1. Place the Curse of Dragor CD in your CD-ROM drive.
2. Double click on the "Curse of Dragor CD" icon on your desktop.
3. Double click on the "Curse of Dragor" game icon.

If you notice poor game performance, try playing the game with the installation program on the CD. ENJOY YOUR GAME!
